45%

of people have been bullied  
online

87%

of youths have witnessed  
cyberbullying

30%

of children turn to self-harm  
after experiencing cyberbullying

## CYBERBULLYING

Most kids who are harassed online by cyberbullies suffer emotional distress but never tell their parents. Monitoring can alert you if someone may be bullying your child – or if your child has been bullying someone else.

## ONLINE PREDATORS

The Internet is the #1 tool of child predators for finding and developing friendships with children. You won't know if one has been talking to your child unless you're watching. To help make sure you set up your privacy settings to make sure that you protect their personal information. Children unintentionally reveal more about themselves and their whereabouts than they should online, helping dangerous "digital strangers" find them in the real world.

## INAPPROPRIATE CONTENT

Most kids who are harassed online by cyberbullies suffer emotional distress but never tell their parents. Monitoring can alert you if someone may be bullying your child – or if your child has been bullying someone else.
