

# PROBLEM IN YOUR CLASS?

**Help & advice** if there's any form of **cyberbullying** within your class

## Take It Seriously

Cyber-bullying can be a living hell for the children who experience it, so don't pretend that it's just a few nasty words in the playground.

## Netiquette

Every school should be teaching their children about what is acceptable practice in cyber-communications and what isn't.

## Get the parents involved

If I had a child that was being insulted, harassed and bullied by some mysterious cowards, I'd imagine I'd like to know about it.

## Have a School Policy

This has been a requirement in all NI schools since the Education and Libraries (Northern Ireland) Order 2003

## Teach children how to deal with cyberbullying

This means encouraging them to report it whenever it happens.

# CYBERBULLYING AWARENESS LESSON PLAN

Create a group discussion about cyberbullying. Make sure that everyone has a clear understanding on what cyberbullying is.

Ask if they know how to report and handle cyber bullying on different platforms such as Instagram, Snapchat, Facebook, etc. Get them to write their ideas on a page.

Get feedback by making the students present their ideas in groups or as a class. Make this a class discussion.

Watch these YouTube videos and get feedback afterwards.

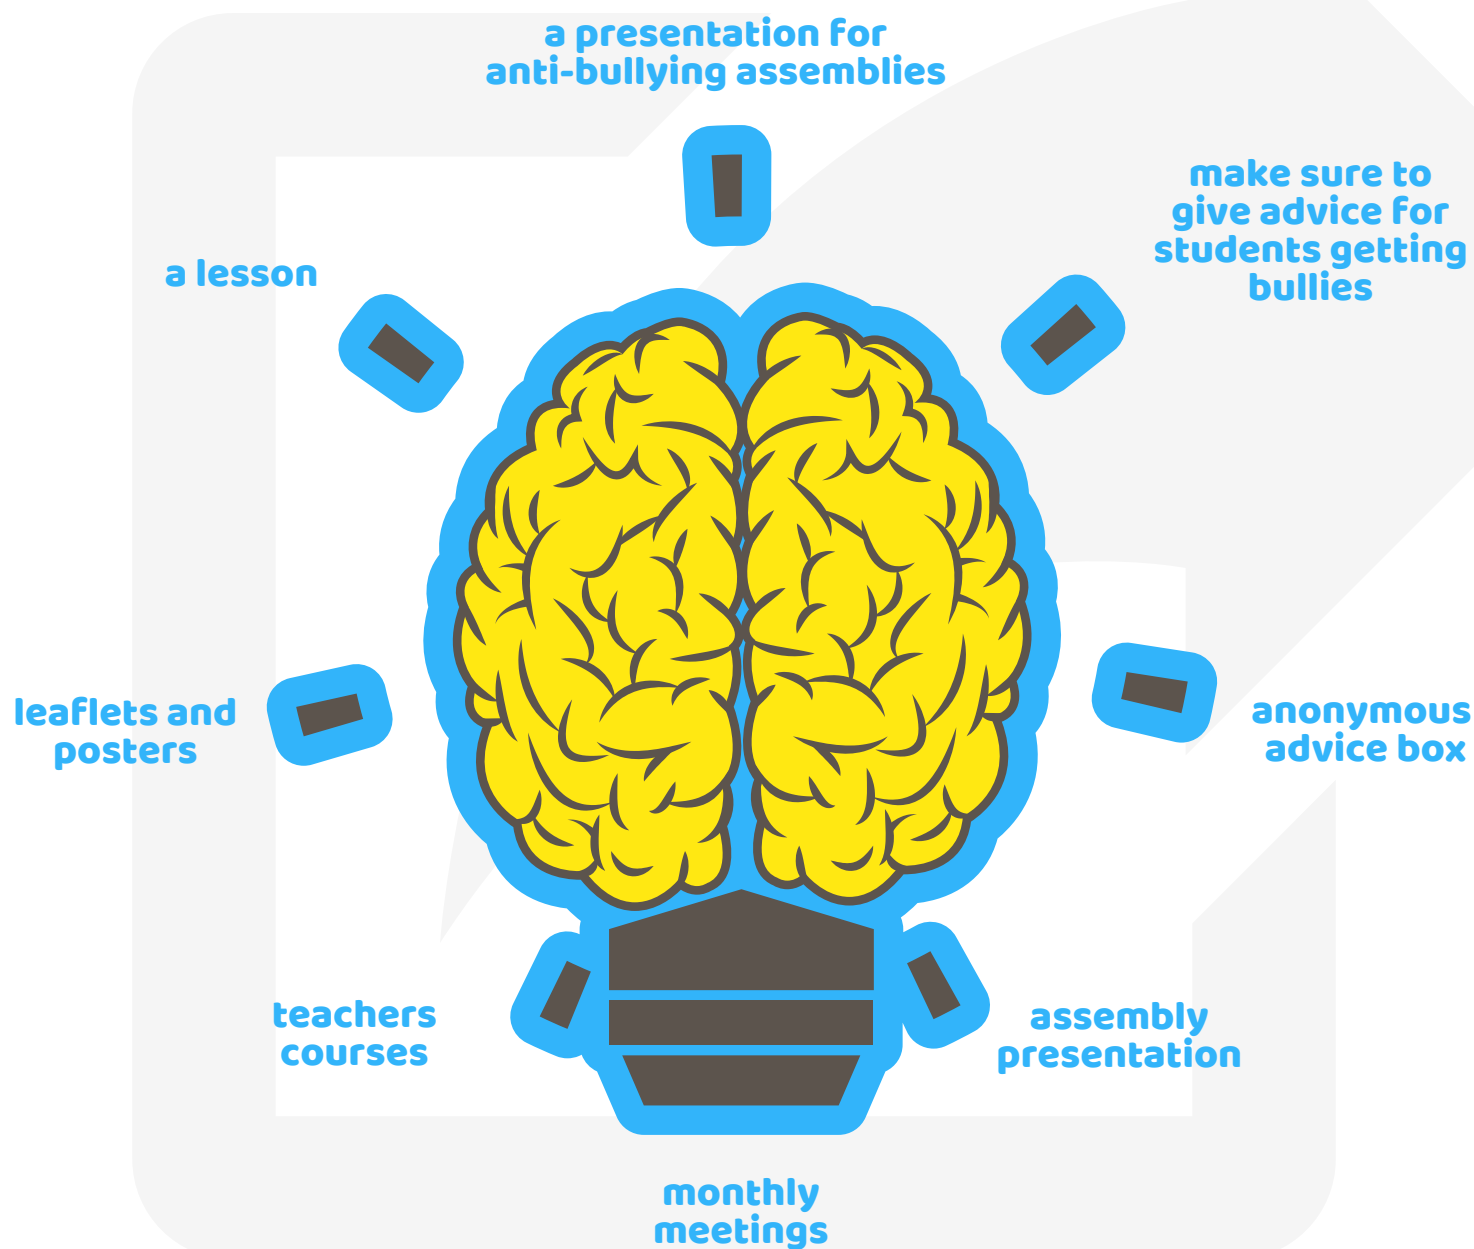

- <https://www.youtube.com/watch?v=2GRua-iRwuU>
- [https://www.youtube.com/watch?v=6ctd75a7\\_Yw](https://www.youtube.com/watch?v=6ctd75a7_Yw)

Do a final class discussion and get feedback on what the students have learnt in this lesson.

Give out cyberbullying leaflets or business cards from cyberbullying awareness or prevention organisations.
